1. DESCRIPTION

Viking Quick Response Dry Horizontal Sidewall Sprinklers are thermosensitive spray sprinklers suitable for use in areas subject to freezing. The sprinklers are designed for dry systems and preaction systems where it is necessary to prevent water or condensation from entering the drop nipple before sprinkler operation. They may also be installed in spaces subject to freezing and supplied from a wet system in an adjacent heated area.

Viking Quick Response Dry HSW Sprinklers are available in various finishes and temperature ratings to meet design requirements. The special Polyester and Electroleass Nickel PTFE (ENT) coatings have been investigated for installation in corrosive atmospheres and are listed/approved as corrosion resistant as indicated in the Approval Charts. (Note: FM Global has no approval classification for Polyester coatings as corrosion resistant.)

**NOTE:** When installed in some corrosive environments, the Polyester finish may change color. This natural discoloration over time is not in itself an indication of corrosion and should not be treated as such. All sprinklers installed in corrosive environments should be replaced or tested as described in NFPA 25 on a more frequent basis.

2. LISTINGS AND APPROVALS

- cULus Listed: Category VNIV
- FM Approved: Classes 2013 and 2015
- NYC Approved: MEA 89-92-E, Volume 15

Refer to Approval Chart 1 and Design Criteria on page 106c for cULus Listing requirements, and refer to Approval Chart 2 and Design Criteria on page 106d for FM Approval requirements that must be followed.

3. TECHNICAL DATA

**Specifications:**
- Available since 1993.
- Minimum Operating Pressure: 7 psi (0.5 bar)
- Factory tested pneumatically to 100 psi (6.89 bar)
- Thread size: 1” NPT or 25 mm BSP
- Nominal K-Factor: 5.6 U.S. (80.6 metric*) for all listed and approved lengths.

* Metric K-factor measurement shown is when pressure is measured in Bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.

**Glass-bulb fluid temperature rated to -65 °F (-55 °C)**

**Material Standards:**
- Frame Casting: Brass UNS-C84400
- Deflector: Phosphor Bronze UNS-C51000
- Belleville Spring Sealing Assembly: Nickel Alloy, coated on both sides with PTFE Tape
- Compression Screw: Brass UNS-C36000
- Pip Cap: Brass UNS-C31400 or UNS-C31600
- Pip Cap Adapter: Brass UNS-C36000
- Orifice: Copper UNS-C22000 or UNS-C11000
- Tube: ERW Hydraulic Steel Tube
- Support (Internal): Stainless Steel UNS-S30400
- Barrel: Steel Pipe UNS-G10260, Electrodeposited Epoxy Base finish
- Barrel End and Threads: QM Brass
- Sleeve (for Adjustable Standard style only): Brass UNS-C26000 or UNS-C26800

**Escutcheon Materials:**
- Adjustable Standard Dry Escutcheons: Brass UNS-C26000 or UNS-C26800
- Recessed Dry Escutcheons: Cold Rolled Steel UNS-G10080
- ENT Coated Adjustable and Recessed Escutcheons: Stainless Steel UNS-S30400

**Ordering Information:** (Also refer to the current Viking price list.)

Order OR Dry HSW Sprinklers by first adding the appropriate suffix for the sprinkler finish, the appropriate suffix for the temperature rating, and then the suffix for the length (“A” dimension) to sprinkler base part number. Order in a specific length noted as the “A” dimension. The “A” dimension is the distance from the face of the fitting (tee) to the desired finished surface of the wall in which it is to be installed.

These sprinklers are listed and approved in lengths from 1-1/2” to 45-1/2” (38.1 mm to 1,156 mm) for the adjustable standard style, 3” to 47” (76.2 mm to 1,194 mm) for the plain barrel style, and 3-1/4” to 47-1/2” (82.5 mm to 1,207 mm) for the adjustable recessed style.
The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058
Telephone: 269-945-9501  Technical Services: 877-384-5464  Fax: 269-818-1680  Email: techsvcs@vikingcorp.com

Lengths exceeding the standard lengths are available, with no approvals, on a “made-to-order” basis: Recessed Dry HSW up to 65-1/2" (1,664 mm). Adjustable Standard Dry HSW up to 63-1/2" (1,613 mm). Plain Barrel Dry HSW up to 65" (1,651 mm). Contact the manufacturer for more information.

Finish Suffix: Brass = A, Chrome = F, White Polyester = M/W, and ENT = JN
Temperature Suffix: 155 °F (68 °C) = B, 175 °F (79 °C) = D, 200 °F (93 °C) = E, 286 °F (141 °C) = G
Escutcheon Suffix = Y for the adj. recessed sprinkler with the Model G-1 Escutcheon (no suffix needed for the Model E-1 Escutcheon).

For example, sprinkler VK182 with 1” NPT Threads, a Chrome finish, a 155 °F (68 °C) temperature rating, the Model G-1 Escutcheon, and "A" length of 10" = Part No. 08386UFBY10.

Available Finishes And Temperature Ratings: Refer to Table 1.

Accessories: (Also refer to the “Sprinkler Accessories” section.)

Sprinkler Wrenches:
A. Standard Wrench: Part No. 07297W/B (available since 1991)
B. Wrench for recessed sprinklers: Part No. 07565W/B** (available since 1991)

**A ½" ratchet is required (not available from Viking).

Dry Sprinkler Protective Cover: Part No. 15610
Replacement Escutcheons:
A. Adjustable Standard Dry Escutcheon: Base Part No. 08086F
B. Model E-1 Recessed Dry Escutcheon Cup: Base Part No. 05459

4. INSTALLATION
Refer to appropriate NFPA Installation Standards.

5. OPERATION
During fire conditions, the heat-sensitive liquid in the glass bulb expands, causing the glass to shatter, releasing the internal parts to open the waterway. Water flowing through the sprinkler orifice strikes the sprinkler deflector, forming a uniform spray pattern to extinguish or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE
Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.

7. AVAILABILITY
The Viking Quick Response Dry Horizontal Sidewall Sprinkler is available through a network of domestic and international distributors. See The Viking Corporation web site for the closest distributor or contact The Viking Corporation.

8. GUARANTEE
For details of warranty, refer to Viking’s current list price schedule or contact Viking directly.

Sprinkler Finishes: Brass, Chrome, White Polyester, and ENT
Corrosion-Resistant Coating: White Polyester and ENT in all temperature ratings

Footnotes

1. The sprinkler temperature rating is stamped on the deflector.
2. Based on NFPA-13. Other limits may apply, depending on fire loading, sprinkler location, and other requirements of the Authority Having Jurisdiction. Refer to specific installation standards.
3. The corrosion-resistant Polyester and ENT coatings have passed the standard corrosion test required by the approving agencies indicated in the Approval Charts. These tests cannot and do not represent all possible corrosive environments. Note: These coatings are NOT corrosion proof. Prior to installation, verify through the end-user that the coatings are compatible with or suitable for the proposed environment. Polyester and ENT coatings are applied to the exposed exterior surfaces only. Note that the spring is exposed on sprinklers with Polyester and ENT coatings.
4. When installed in some corrosive environments, the Polyester finish may change color. This natural discoloration over time is not in itself an indication of corrosion and should not be treated as such. All sprinklers installed in corrosive environments should be replaced or tested as described in NFPA 25 on a more frequent basis.
**TECHNICAL DATA**

**QUICK RESPONSE DRY Horizontal SIDEWALL SPRINKLERS**

The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058

---

**Figure 2: Wrench 07565W/B for Adjustable Recessed Dry Horizontal Sidewall Sprinklers**

1. Determine the distance from the face of the tee to the finished face of the wall.
2. Round to the nearest 1/2" (12.7 mm) between 1-1/8" (38.1 mm) and 4-1/2" (114.3 mm).

**NOTE:** The deflector will extend approximately 4-1/8" (104.8 mm) from the wall with 2° ± 1/2° (25.4 mm) horizontal adjustment available.

---

**Figure 3: Adjustable Standard Dry Horizontal Sidewall Sprinkler**

**Figure 4: Adjustable Standard Escutcheon Installation**

**STEP 1:** Align the slot in the escutcheon with the horizontal surface of the deflector as shown.
**STEP 2:** Push the rounded end of the slot against the near edge of the deflector. Push the far side of the escutcheon past the deflector, toward the sleeve.
**STEP 3:** Pull the escutcheon away from the near edge of the deflector. Move the rear side of the escutcheon over the deflector.
**STEP 4:** Push and rotate the escutcheon onto the sleeve.
**STEP 5:** To minimize visibility of the slot in the escutcheon, position the slot at the top of the sprinkler sleeve.

Approved Temperature Ratings
A - 155°F (68°C), 175°F (79°C), 200°F (93°C), and 286°F (141°C)
B - 155°F (68°C), 175°F (79°C), and 200°F (93°C)

Approved Finishes and "A" Dimensions
1. Chrome, or White Polyester’ sprinkler with a Chrome, Brass, or White Polyester Sleeve and Escutcheon with “A” dimensions 1-1/2” to 45-1/2” (38.1 mm to 1,156 mm)
2. Chrome, or White Polyester’ with “A” dimensions 3-1/4” to 47-1/2” (82.5 mm to 1,207 mm)
3. Chrome, Brass, White Polyester, or ENT with “A” dimensions 3” to 47” (76.2 mm to 1,194 mm)
4. Chrome or Brass with “A” dimensions 3” to 47” (76.2 mm to 1,194 mm)
5. ENT sprinkler with an ENT Sleeve and Escutcheon with “A” dimensions 1-1/2” to 45-1/2” (38.1 mm to 1,156 mm)
6. ENT with “A” dimensions 3-1/4” to 47-1/2” (82.5 mm to 1,207 mm)

Footnotes
1. Part number shown is the base part number. For complete part number, refer to current Viking price list schedule.
3. Metric K-factor shown is for use when pressure is measured in bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.
4. This chart shows the listings and approvals available at the time of printing. Other approvals may be in process. Check with the manufacturer for any additional approvals.
5. Listed by Underwriter’s Laboratories for use in the U.S. and Canada for Light Hazard occupancies only.
6. Accepted for use, City of New York Department of Buildings, MEA Number 89-92-E, Vol. 15.
7. cULus Listed as corrosion resistant.

NOTE: When using CPVC fittings with Viking dry sprinklers, use only new Nibco Model 5012-S-BI tees. When selecting other CPVC fittings, contact Viking Technical Services.

Quick Response Dry Horizontal Sidewall Sprinklers are cULus Listed as indicated in Approval Chart 1 for installation in accordance with the latest edition of NFPA 13 for standard spray sprinklers:
• Limited to Light Hazard occupancies only.
• Protection areas and maximum spacing shall be in accordance with the tables provided in NFPA 13.
• Minimum spacing allowed is 6 ft. (1.8 m).
• Deflector must be positioned between 4” and 6” (102 mm and 152 mm) below the ceiling. Keep the top of the deflector oriented parallel with the ceiling.
• Locate no less than 4” (102 mm) from end walls.
• Maximum distance from end walls shall be no more than one-half of the allowable distance between sprinklers. The distance shall be measured perpendicular to the wall.
• The sprinkler installation and obstruction rules contained in NFPA 13 for sidewall standard spray sprinklers must be followed.

IMPORTANT: Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to page DRY1-3 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, LPCB, APSAD, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.

1 Part number shown is the base part number. For complete part number, refer to current Viking price list schedule.

2 K-Factor applies for standard lengths ("A" Dimensions indicated above).

3 Metric K-factor shown is for use when pressure is measured in bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.

4 This chart shows the FM Approvals available at the time of printing. Other approvals may be in process. Check with the manufacturer for any additional approvals.

5 FM approved as corrosion resistant.

### DESIGN CRITERIA - FM

(Also refer to Approval Chart 2 above.)

**NOTE:** When using CPVC fittings with Viking dry sprinklers, use only new Nibco Model 5012-S-BI tees. When selecting other CPVC fittings, contact Viking Technical Services.

**FM Approval Requirements:**

The Dry HSW Sprinklers in the Approval Chart above are FM Approved as quick response Non-storage standard spray sprinklers as indicated in the FM Approval Guide. For specific application and installation requirements, reference the latest applicable FM Loss Prevention Data Sheets (including 2-0) and Technical Advisory Bulletins. FM Global Loss Prevention Data Sheets and Technical Advisory Bulletins contain guidelines relating to, but not limited to: minimum water supply requirements, hydraulic design, ceiling slope and obstructions, minimum and maximum allowable spacing, and deflector distance below the ceiling.

**NOTE:** The FM installation guidelines may differ from cULus and/or NFPA criteria.

**IMPORTANT:** Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to page DRY1-3 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, FM Global, LPCB, APSAD, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.

Press the cover together until it snaps closed.

Figure 7: Quick Response Plain Barrel Dry Horizontal Sidewall Sprinkler

Top View - Dry HSW Sprinkler
Side View - Sprinkler Cover 15610
NOTE: Shown with an Adjustable Standard Dry HSW Sprinkler. The protective cover may also be used with the Adjustable Recessed or Plain Barrel style Dry HSW Sprinkler.

After the sprinkler is installed, carefully place the cover over the dry sprinkler as shown.

NOTE: Remove the sprinkler clip and cover before placing the system in service!

Figure 8: Dry Horizontal Sidewall Sprinkler Cover Part Number 15610 (shown with an Adjustable Standard Dry HSW Sprinkler) (Optional for temporary use with Viking Dry HSW Sprinklers until finish work is completed around the sprinkler.)
Seal the clearance space around the sprinkler barrel to avoid leakage of air into the protected area and consequent formation of condensate around the sprinkler frame, which could inhibit operation or cause premature operation. Refer to Figure 10.

If humidity and temperature differential causes condensation on the exposed dry sprinkler barrel, consider wrapping the exposed barrel with insulation, foam insulation tape, or equivalent.

Install the 1” NPT threaded end of the dry sidewall sprinkler into the 1” NPT outlet of a male iron tee fitting per ANSI B 16.3 (Class 150) or cast iron threaded tee fitting per ANSI 16.4 (Class 125) only.

NOTE: To locate the deflector at the maximum distance from the wall, with no adjustment available, order the standard dry horizontal sidewall sprinkler 1” longer than the ‘A’ dimension. Up to 2” (50.8 mm) adjustment is available.

NOTE: To locate the deflector at the minimum distance from the wall, with no adjustment available, order the standard dry horizontal sidewall sprinkler 1” shorter than the ‘A’ dimension.

Minimum wall openings diameter 1-3/4” (44.5 mm)
Maximum wall opening diameter 2-1/4” (57 mm).

Figure 9: Dry Horizontal Sidewall Sprinkler Required Minimum Barrel Length Based on Ambient Temperature in the Protected Area (Adjustable Standard Dry HSW Sprinkler is Shown)

Figure 10: Dry Sprinkler Seal (Adjustable Standard Dry HSW Sprinkler is Shown)
